

TIGER[®] RAIL CUTTING WHEELS

LONG LIFE & FAST CUT HIGH PERFORMANCE CUTTING

Tiger Zirc rail cutting wheels cut faster and last longer so you get proven productivity at an exceptional total cost. The self-sharpening zirconia alumina grains retain a high cut rate throughout the life of the wheel while a hard bond delivers long wheel life for heavy-duty applications like rail cutting.

Designed specifically for high speed gas saws, these wheels deliver the high performance solution needed to increase productivity and profitability.

TYPE 1 FOR HIGH SPEED RAIL SAWS

STEEL / METAL TIGER ZIRC / Fast Cut & Long Life / Rail Cutting

Diameter	Thickness	Arbor	Grade	Max. RPM	Std. Pack	Item #
14"	1/8"	1"	Z24U	5,500	10	58028
16"	1/8"	1"	Z24U	4,800	10	58029

BENEFITS OF TIGER ZIRC:

- **Self-sharpening** zirconia alumina grain retains high cutting performance throughout the life of the wheel.
- **Extended wheel life** on heavy duty applications.
- **Dual reinforcement** provides added strength for aggressive cutting.
- **Metal bushed 1 inch open arbor** for fast easy mounting on gas and hydraulic rail saws.
- **Integrated mold on blotter** for easy mounting on high-speed gas and hydraulic rail saws.
- Specifically designed for **hard-to-grind alloys steels** utilized in modern rail applications.

Tiger Zirc Cuts Faster & Lasts Longer.
