MORE LIFE & MORE OPTIONS

Weiler's Tiger Bobcat mini flap discs now deliver enhanced performance, lasting longer and removing more material, lowering the total cost of use. The expanded line now offers a threaded button R mount in addition to the current S mount for greater versatility to fit the most popular styles of hub pads. These discs are designed for use on die grinders to provide smooth grinding and enhanced conformability in tight areas.

FEATURES AND BENEFITS

- **Increased Life** – The improved design lasts 1 1/2 times longer, lowering the total cost of use.
- **Aggressive Grinding** – Bobcat sheds cloth and exposes new grain, delivering a consistent, aggressive cut rate and removing 3 times more material over the life of the disc than a comparable blending disc.
- **Mounting Options** – Both R mount (button) and S mount (threaded arbor) quick-change options fit the most popular styles of hub pads.

APPLICATIONS

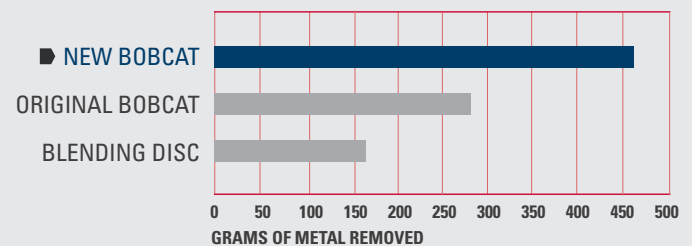

Grinding, Blending, Edge Chamfering, Weld Blending, Deburring & Finishing

BEST ON

Steel, Stainless Steel, Structural Steel and Cast Iron

NEW BOBCAT REMOVES MORE MATERIAL

GRAMS OF METAL REMOVED FROM WORKPIECE OVER LIFE OF DISC

Test Procedure: New Bobcat 3" 60 grit disc vs. original Bobcat 3" 60 grit disc vs. 3" 60 grit blending disc.
